Claude Code 101

Learn how to use Claude Code effectively in your daily development workflow.

Introduction to Claude Cowork

Learn to work alongside Claude on your real files and projects. This hands-on course covers the Cowork task loop, plugins and skills, file and research workflows, and how to steer multi-step work responsibly — so you're productive in your first week.

Complete

Claude Code in Action

Integrate Claude Code into your development workflow

AI Fluency: Framework & Foundations

Learn to collaborate with AI systems effectively, efficiently, ethically, and safely

Registered

Building with the Claude API

This comprehensive course covers the full spectrum of working with Anthropic models using the Claude API

Introduction to Model Context Protocol

Learn to build Model Context Protocol servers and clients from scratch using Python. Master MCP's three core primitives—tools, resources, and prompts—to connect Claude with external services

AI Fluency for educators

This course empowers faculty, instructional designers, and educational leaders to apply AI Fluency into their own teaching practice and institutional strategy.

AI Fluency for students

This course empowers students to develop AI Fluency skills that enhance learning, career planning, and academic success through responsible AI collaboration.

Model Context Protocol: Advanced Topics

Discover advanced Model Context Protocol implementation patterns including sampling, notifications, file system access, and transport mechanisms for production MCP server development.

Claude with Amazon Bedrock

As part of an accreditation program created for AWS, Anthropic launched a first-of-its-kind training for AWS employees. Here's the full course so you can follow along.

Claude with Google Cloud's Vertex AI

This comprehensive course covers the full spectrum of working with Anthropic models through Google Cloud's Vertex AI.

Teaching AI Fluency

This course empowers academic faculty, instructional designers, and others to teach and assess AI Fluency in instructor-led settings.

AI Fluency for nonprofits

This course empowers nonprofit professionals to develop AI fluency in order to increase organizational impact and efficiency while staying true to their mission and values.

Introduction to agent skills

Learn how to build, configure, and share Skills in Claude Code — reusable markdown instructions that Claude automatically applies to the right tasks at the right time. This course takes you from creating your first Skill to distributing them across teams and troubleshooting common issues.

Introduction to subagents

Learn how to use and create sub-agents in Claude Code to manage context, delegate tasks, and build specialized workflows that keep your main conversation clean and focused.

AI Capabilities and Limitations

An introductory course about how AI works

AI Fluency for Small Businesses

This course empowers small businesses to develop AI fluency in order to increase organizational impact and efficiency while staying true to their mission and values.

Data and Privacy

What is Skilljar and why am I logging into it? —

Skilljar is a learning management system that hosts our educational content. You're logging into it to access the Anthropic course materials. This separate platform allows us to provide interactive learning experiences, track your progress, and ensure you have access to all course resources in an organized way.

What information does Skilljar collect about my learning activity? —

Skilljar collects basic learning analytics such as course progress, lesson completion status, quiz scores, and time spent on materials. This data helps us understand how you're progressing through the course and allows us to provide you with completion certificates. All data collection is focused on improving your learning experience, and is subject to Skilljar's Privacy Policy.

How is my Skilljar data different from my Anthropic account data? —

Skilljar only tracks your learning progress within this course platform, while your Anthropic account manages your access to the Anthropic Console and/or Claude AI services.

Is Skilljar secure? Where is my data stored? —

Yes, Skilljar employs industry-standard security measures including data encryption, secure hosting, and regular security audits. Your learning data is stored on secure servers with appropriate access controls. Skilljar is SOC 2 compliant and follows best practices for data protection to ensure your information remains safe and private.

How do I delete my learning activity or account? —

To request deletion of your learning data or account, email academy-support@anthropic.com. Your request will be processed in accordance with applicable privacy laws and our data retention policies. Note that some data may need to be retained for legitimate business purposes, such as compliance or security, but we'll delete all personal information where legally permissible.

Do I need an Anthropic account to access the learning content? —

No, you don't need an Anthropic account to access this learning content. The course is hosted on Skilljar and only requires a Skilljar account for access. However, if you want to use Claude AI services after completing the

course, you would need to create a separate Anthropic account at claude.ai.
