Results within 2 business days with detailed section breakdowns. Digital certificate recognized by companies using Claude.

Exam Pricing

\$99 per exam. Fixed discount offered to approved partners in the Claude Partner Network.

What You'll Be Tested On

60 questions across five core competency areas

- **Agentic Architecture & Orchestration** 27%

Design agentic loops, orchestrate multi-agent systems with coordinator-subagent patterns, implement task decomposition, and manage session state and workflow enforcement.

- **Tool Design & MCP Integration** 18%

Design effective tool interfaces with clear boundaries, implement structured error responses, integrate MCP servers, and distribute tools appropriately across agents.

- **Claude Code Configuration & Workflows** 20%

Configure CLAUDE.md hierarchies, create custom slash commands, apply path-specific rules, know when to use plan mode, and integrate into CI/CD pipelines.

- **Prompt Engineering & Structured Output** 20%

Design prompts with explicit criteria, apply few-shot techniques, enforce structured output with JSON schemas, and implement validation and retry loops.

- **Context Management & Reliability** 15%

Preserve critical information across long interactions, design escalation patterns, manage error propagation in multi-agent systems, and handle uncertainty with confidence calibration.

Exam Scenarios

Each exam draws 4 scenarios at random from this set of 6. Every scenario frames a realistic production context for a set of questions.

Scenario 1

Customer Support Resolution Agent

You are building a customer support resolution agent using the Claude Agent SDK. The agent handles high-ambiguity requests like returns, billing disputes, and account issues. It has access to your backend systems through custom MCP tools (`get_customer`, `lookup_order`, `process_refund`, `escalate_to_human`). Your target is 80%+ first-contact resolution while knowing when to escalate.

Agentic Architecture & Orchestration

Tool Design & MCP Integration

Context Management & Reliability

Scenario 2

Code Generation with Claude

You are using Claude Code to accelerate development. Your team uses it for code generation, refactoring, debugging, and documentation. You need to integrate it into your development workflow with custom slash commands, CLAU configurations, and understand when to use interactive mode vs direct execution.

FAQ

Who is this certification for?

—

This certification is currently available to Anthropic partners. It's intended for a technical audience — a ~301 level exam designed for practitioners who have foundational knowledge and are ready to demonstrate deeper, applied expertise. If your organization isn't yet an Anthropic partner, you can apply to become one.

What are the prerequisites? —

Completion of at least all 200-level courses in the course catalog, working familiarity with Agent SDK, and having built solutions with Claude Code, Agent SDK, Anthropic API, and MCP.

How should I prepare? —

Get very familiar with the Exam Guide — it contains the scenarios that will appear on the exam, the domains and skill areas, and preparation exercises. Then take the Practice Exam and aim for a score greater than 900/1000.

Will the exam be proctored? —

Yes, we've partnered with ProctorFree for exam proctoring.

How many attempts are permitted? —

One attempt.

Is there a cost? —

The exam is \$99. Approved partners in the Claude Partner Network receive a fixed discount.

Do I get a badge if I pass? —

Yes! Practitioners who pass receive a CCA-F badge that is shareable on LinkedIn.

What policies apply when I take the exam? —

By registering, you agree to abide by the Certification Terms & Conditions and the Anthropic Certification Exam Policy. Please review both before your exam session.

Have a question not covered here? —

Email Anthropic Education Support at academy-support@anthropic.com.
